

SOPHIA
GENETICS®

Company Overview

Sophia Genetics is a young and dynamic company, the Global Leader in Data Driven Medicine with headquarters in Switzerland. With over 70 employees from 21 different nationalities, we are present in 20 different countries mainly in Europe. Sophia Genetics helps clinical laboratories that perform routine clinical genetic analysis for personalized healthcare to overcome the cost and complexity related to the bioinformatics analysis, highly secured banking and reliable interpretation of the massive quantity of patient data generated by Next Generation Sequencing (NGS).

We provide Sophia DDM™, a clinical-grade NGS analytics platform for routine diagnostics. Our goal is to simplify and enhance genetic testing providing the most efficient bioinformatics solution for clinical genetic data analysis.

We are rapidly growing in order to meet demand, and are looking for bright and motivated people to join our team of Bioinformaticians and Software Engineers.

Quality Assurance Assistant

Job Description

As a Quality Assistant

- You will assist the Quality Manager for the all the Quality Management processes.
- You will actively participate to the maintenance of the QMS.
- You will generate training materials and ensure training sessions related to our quality management system.
