

## Quality Management System Manager (Ref. 26434)

Meggitt PLC is a global engineering group specialised in extreme environment components and smart sub-systems for aerospace, defence and energy markets. Some 11'000 people are employed across manufacturing facilities in Asia, Europe and North America and regional bases in Brazil, India and the Middle East.

Meggitt Sensing System (MSS) is one of the 5 strategic business units of Meggitt PLC, with its headquarter in Fribourg Switzerland. Meggitt Fribourg develops, manufactures and sells, world-wide, a complete range of transducers and electronic systems for the monitoring of engines, turbines and other rotating machinery in both the aerospace and energy industries.

To further strengthen our “ Quality, Flight Safety & HSE” department, we are currently looking for a “ Quality Management System Manager”.

### The Position

The main responsibilities for this role are:

- Managing and leading the Quality Management System team (3 FTE);
- Preparing and maintaining procedures, documentations and approvals to ensure the company's continued compliance with AS/EN9100, with customer requirements and with airworthiness regulations thru our Quality Management System;
- Preparing, managing, obtaining and renewing quality certifications to sustain the business;
- Leading internal and external audits with the objective of continually improving the quality system;
- Managing the implementation of sustainable actions to correct and prevent recurrence of non conformances raised during internal and external audits;
- Providing assistance, training and dedicated communications to improve continuously the quality culture within the processes and the organization;
- Participating to the Continuous Improvement program, leading the quality relationship with some customers and take ownership on quality initiatives for department effectiveness.

### Your Profile

- Engineer or University Degree in Quality or equivalent;
- Proven knowledge and relevant experience in a similar position for Design, Manufacturing and Maintenance environment driven by demanding business (aerospace, medical, automotive);
- Certification as Auditor;
- Knowledge of civil aviation regulations will be a plus;
- Good knowledge of problem solving methods and tools;
- Effective communication skills to deal with people at all levels of the organization;
- Collaborative and communicative, you are team-oriented and appreciate working in team;
- French fluent, good command (spoken & written) of English required, German a plus.

If you are looking for a challenging position with opportunity to grow in a truly international company, please send your application (resume, letter of motivation, reference letters and diploma) in English to [hr@ch.meggitt.com](mailto:hr@ch.meggitt.com). Please note that only complete applications will be taken into consideration.
